ULLIBARRI-GAMBOA RESERVOIR

Landscapes teeming with life and memories

The Ullibarri-Gamboa reservoir, located in the heart of Álava and about 15 km from Vitoria-Gasteiz, is a landscape shaped by **water, nature and memories**.

Constructed on the Zadorra river in the middle of the 20th century in order to secure water supplies, it has since become one of Álava's **most emblematic nature and recreation sites**.

Its perimeter of over 45 km perimeter encircles over **1,400 hectares** of water, painting an extensive, serene and ever-changing landscape surrounded by hills, grasslands and forests.

Old flooded villages and farmland lie beneath its waters, leaving their mark on the reservoir's identity.

Walkers and cyclists can now venture onto the **cycling and country paths** connecting the small surrounding municipalities that offer countless viewpoints for contemplating the **stillness of the water**.

There are many ways to enjoy the area, whether you prefer walking, cycling, birdwatching in the Mendixur wetlands, kayaking, guided tours or exploring its history and culture.

Each offers a chance to discover the reservoir at your own pace.

INLAND BEACHES

Where water and nature
coincide

The banks of the reservoir are quiet recreational spaces where the water, open spaces and silence come together to offer a peaceful experience that is hard to find elsewhere.

The area has **three inland Blue Flag beaches** — Landa, North Garaio and South Garaio — which have been awarded Blue Flag status for their water quality, environmental management and facilities. Set within provincial parks, these beaches combine safe bathing areas with meadows, woodland and places to relax. **Accessibility and services** have also been adapted to enable people with reduced mobility to enjoy the area, making it an inclusive space open to all.

Walking routes, cycling paths and recreational areas criss-cross the area, encouraging visitors to walk or cycle to discover the reservoir from different angles.

The area's size makes it possible to find a quiet spot even in the busier months, with space to relax and enjoy the surroundings.

THE ULLIBARRI-GAMBOA RESERVOIR ALL YEAR ROUND

Seasonal magic

The reservoir's natural surroundings provide **an ever-changing landscape throughout the seasons**, with each season bringing unparalleled experiences.

Spring

In spring, the landscape becomes a mosaic of colour and life. Woodland, grassland and wetlands come alive again, while **countless birds** find a **special spot to build nests or stop off on their migratory journeys**. Longer days and milder temperatures make visiting the area even more appealing.

Summer

Over summer, the reservoir becomes the perfect place for enjoying the outdoors: **swimming, sailing, kayaking, paddle surfing** or walks before the sun sets. The long daylight hours and gentle breeze create the ideal atmosphere for wandering along the routes, trying out **the cycling paths, stargazing** or watching the sun go down over the water.

Autumn

The woodland turns every shade of ochre, gold and red, creating **particularly camera-worthy** scenery. It is also a good time to watch the migratory birds stopping to rest in the wetlands.

Winter

Winter brings calm to the reservoir and is when it is at its most meditative. **Morning mists**, gentle light and the quietness of the landscape create a special atmosphere. On colder days, **snow on the mountains** contrasts with the blue of the water, the perfect backdrop to a slow winter's walk to watch the wintering birds.

NATURE AND BIODIVERSITY

A watery, species-rich landscape

The Ullibarri-Gamboa reservoir is now one of Álava's most valuable nature areas, a waterscape that supports a rich variety of habitats. **Wetlands, reedbeds, floodplains and riverside forests form a patchwork of great ecological value that belongs to the Natura 2000 network.**

A privileged spot to watch and photograph birds

The **Mendixur Bird Park** is **one of northern Spain's most valuable wetlands for birdwatching**. Its lookouts allow close-up access to the marshes for spotting (without disturbing) **grey herons, marsh harriers, great cormorants, common spoonbills and all kinds of waterfowl and waders**, especially during their spring and autumn migrations.

Open skies and star-strewn nights

The breadth of the panorama and the low levels of light pollution make for clear skies, turning the reservoir into the ideal place to **enjoy starry evenings and nights in a calm space free from noise.**

Walking or cycling through nature

You can **walk or cycle** around the reservoir on a network of cycling and country paths linking nearby villages, natural areas and viewpoints over the water. Its path running all the way around the outside of the reservoir is **one of Álava's biggest draws** for cyclists.

Here you can find a selection of tourism experiences for discovering and enjoying the nature of the reservoir.

NIGHTTIME SOUNDS

Discover the sounds of the forest once the sun has gone down

Immerse yourself in the silence of the forest and listen to the sounds that emerge after dark. In this guided experience you will get to know the reservoir's **nocturnal birds** including tawny owls and long-eared owls, and learn to **recognise** their **calls in the wild**.

This activity is scheduled to take place at night, and after an easy walk, the guide will help you to identify the sounds, understand the behaviour of these species and enjoy **a different kind of experience under the stars**.

You can also take part in simple listening surveys that help monitor these birds and support their conservation.

When: Winter (December to February, when birds are most vocal).

Duration: 2.5-3 hours, at night.

Where: Forested areas of the reservoir.

Ideal for: Families and nature-lovers.

Difficulty: Easy, with a short and simple route.

Remember: This activity is dependent on the weather and natural bird activity.

What to take: Warm clothes, comfortable footwear and a headtorch. The guide will provide any additional equipment.

For further information and bookings: See company list on page 56.

THE DANCE OF THE RESERVOIR

Watch and photograph the courtship ritual of the great crested grebe

Discover the elegant mating ritual of the **great crested grebe**, one of the most impressive and photogenic of the reservoir's birds. This experience allows you to **observe and photograph its courtship ritual in the wild**, at the time of year when it reaches its peak.

The activity begins early in the morning, when the birds are most active. You will visit several observation points to watch and photograph the display without disturbing them.

The morning combines **moments of quiet observation** with short journeys between locations, in an experience that offers time to observe the birds and enjoy the surroundings at an unhurried pace.

 **When:** March and early April.

 **Duration:** From 08:30 to 12:30 (most activity is seen earlier on in the morning).

 **Where:** Observation points and paths around the reservoir.

 **Ideal for:** Birdwatchers, nature-lovers and photography fans (all levels).

 **Difficulty:** Easy. Signposted routes without technical difficulty. Activity based on observation.

 **Remember:** This activity is dependent on the weather and bird behaviour.

 **What to take:** Binoculars are recommended as is keeping silent while birdwatching.

For further information and bookings: See company list on page 56.

THE ORCHID TRAIL

Discover wild orchids in bloom around the reservoir

Step inside the world of **wild orchids** and discover one of the reservoir's most unique natural phenomena. This experience is a **guided botanical tour** to learn about these delicate flowers first-hand, observing how they grow and form part of the landscape.

Along the route, a specialist guide will help you to **identify different species**, understand their life cycles and discover their surprising pollination strategies.

The activity follows a gentle pace, with **frequent stops to enjoy nature** and notice the smaller details of the landscape.

When: Spring, between April and June, depending on flowering.

Duration: 3-4 hours, at a gentle pace.

Where: Paths and meadows around the reservoir.

Ideal for: Fans of nature, botany and (macro) photography.

Difficulty: Easy. Paths are not technically difficult.

Remember: This activity is dependent on the weather and natural flowering conditions.

What to take: Comfortable clothes for outdoors. If taking a camera, bring a macro lens and light tripod.

For further information and bookings: See company list on page 56.

AUTUMN COLOURS AND RUTTING

Experience the colours and sounds of autumn

Discover one of the most evocative and photogenic times of the year around the reservoir, when the **autumn landscape fills with colour**, the **sound of rutting deer breaks the morning quiet** and light tinges the forests.

The experience begins at dawn in **Salburua**, where you can **watch and photograph the bellowing deer** from a quiet spot. From there you can move to other sites around the reservoir to calmly enjoy the **morning mists, reflections in the water and colours of the landscape**.

When: End of September and October, coinciding with the rutting season and the turning of the leaves.

Duration: 3-4 hours (early morning).

Where: Salburua lookout and scenic spots around the reservoir and in the nearby forests.

Ideal for: Nature and photography lovers.

Difficulty: Easy. Simple routes and accessible viewing places.

Remember: This activity is dependent on the weather and deer behaviour.

What to take: Warm clothes and comfortable footwear. Binoculars are recommended for watching the deer.

For further information and bookings: See company list on page 56.

MIRRORS ON THE WATER

Discover the reservoir from its reflections

Explore some of the reservoir's most special corners where **the landscape is reflected in the water creating outstanding images**. This route connects different points with the perfect conditions — still waters, protected shores and picturesque settings — for enjoying the **striking reflections**.

Do this at your own pace or alongside a guide who will help you to understand the landscape in front of you and capture the best shots. An unhurried experience, ideal for **photographing, sketching** or simply **enjoying the area**.

When: All year round (especially in spring and autumn for the light and colours in the landscape).

Duration: 3-4 hours.

Where: Selected points around the reservoir.

Ideal for: Nature, photography and art lovers.

Difficulty: Easy. Accessible routes.

Remember: This activity is dependent on the weather, especially the wind.

What to take: Camera, sketchbook and art materials. A tripod and comfortable clothing also recommended.

For further information and bookings: See company list on page 56.

THE RESERVOIR'S BLUE CHARM

Follow the flight of the kingfisher, one of the reservoir's most special birds

Get up close to one of the most attractive birds on the reservoir, the **kingfisher**. This experience involves a **guided tour to catch sight of this captivating bird**, coinciding with the **mating and courtship period** and the moment when they are most abundant in numbers after **the wintering birds arrive in autumn**.

The route passes through **common kingfisher spots** in fishing areas and natural perches. The route is a mix of short gentle walks and pauses to wait and watch, respecting the birds' behaviour.

 **When:** Spring (mating period) and autumn (arrival of wintering species).

 **Duration:** 3-4 hours.

 **Where:** Places around the reservoir frequented by kingfishers.

 **Ideal for:** Nature, birdwatching and photography lovers.

 **Difficulty:** Easy. Short routes with stops for birdwatching.

 **Remember:** This activity is dependent on the weather and bird behaviour.

 **What to take:** Binoculars are recommended as well as inconspicuous clothing.

For further information and bookings: See company list on page 56.

UNDER THE STARS

Enjoy the night sky in a unique setting

As night falls over the reservoir, look up and discover a **sky filled with stars**. With **little light pollution** to dim the view, it is a beautiful place to watch the night sky come alive.

The activity is held during one of the most anticipated moments of the summer — the meteor shower known as **The Perseids**, or the **'Tears of St. Lawrence'** — in the vicinity of the Guevara Tower and Palace, a historic setting that adds another dimension to the experience.

With telescopes and guidance from an expert, you will learn to **recognise constellations and planets, and enjoy spotting shooting stars**.

When: Perseid meteor shower week (10–15 August).

Duration: 2-3 hours.

Where: Guevara Tower and Palace.

Ideal for: All ages and astronomy and nature lovers.

Difficulty: Easy.

Remember: This activity is dependent on night sky visibility and weather conditions.

What to take: Warm clothes and comfortable footwear. Bring a blanket or mat to lie on for stargazing if you can.

For further information and bookings: See company list on page 56.

BIRDWATCHING BY BIKE

Explore the best birdwatching spots on two wheels

Cycle around the reservoir while you discover its natural wealth. This experience combines **gentle physical activity** with **birdwatching** and time to **enjoy the landscape** along the Green Route, one of Álava's **most attractive cycling routes**.

This **slow-paced** route combines pedalling with stops at strategic sites to birdwatch and appreciate the local environment. An active and alternative way of connecting with nature.

 **When:** All year round (especially in spring and autumn).

 **Duration:** 3-4 hours.

 **Where:** Sections of the reservoir's Green Route.

 **Ideal for:** Nature lovers and cycling tourists.

 **Difficulty:** Medium-low. Routes on tracks and paved paths.

 **Remember:** This activity is weather-dependent.

 **What to take:** Comfortable clothes for cycling. Bring binoculars.

For further information and bookings: See company list on page 56.

CYCLING BY THE WATER

Cycle through nature, by the water, and discover local cuisine

Use **two wheels** to discover the reservoir in an experience that combines physical activity, landscape appreciation and local **food and drink**. Cycling along one of **Álava's most appealing cycling paths**, the Green Route, you will pedal surrounded by water, woodland and wildlife.

The route is taken at a **gentle pace**, combining pedalling with strategically-placed stops to **birdwatch and learn about the environment**. An active and accessible way of enjoying the landscape, adapted to different abilities with electric or standard cycles. **The perfect way to unwind**.

When: Spring, summer and autumn.

Duration: 4-5 hours (depending on route and pace).

Where: Sections of the reservoir's Green Route.

Ideal for: Cycling tourists.

Difficulty: Low-medium. Adaptable and also suitable for electric bikes.

Remember: This activity is dependent on the weather.

What to take: Comfortable clothes, sun protection and water.

For further information and bookings: See company list on page 56.

SUSTAINABLE FISHING IN A KAYAK

A prime location for pike fishing

Experience the reservoir from a different perspective with a day of **angling from a kayak**. You will navigate slowly through **quiet, less-visited parts of the reservoir**, all with a minimal impact on the environment.

The experience is based on **sustainable fishing**, practising **catch and release** and focusing on observation, patience and respect for the environment. This activity is more than just fishing though; it is a way of switching off and enjoying the **silence of the water**.

 **When:** Autumn and winter.

 **Duration:** 4-5 hours.

 **Where:** Strategic points of the reservoir.

 **Ideal for:** Fishing fans.

 **Difficulty:** Medium. Requires basic fitness for kayaking.

 **Remember:** This activity is dependent on water conditions, prevailing regulations and pike behaviour.

 **What to take:** Comfortable clothing, sun protection and a change of clothes.

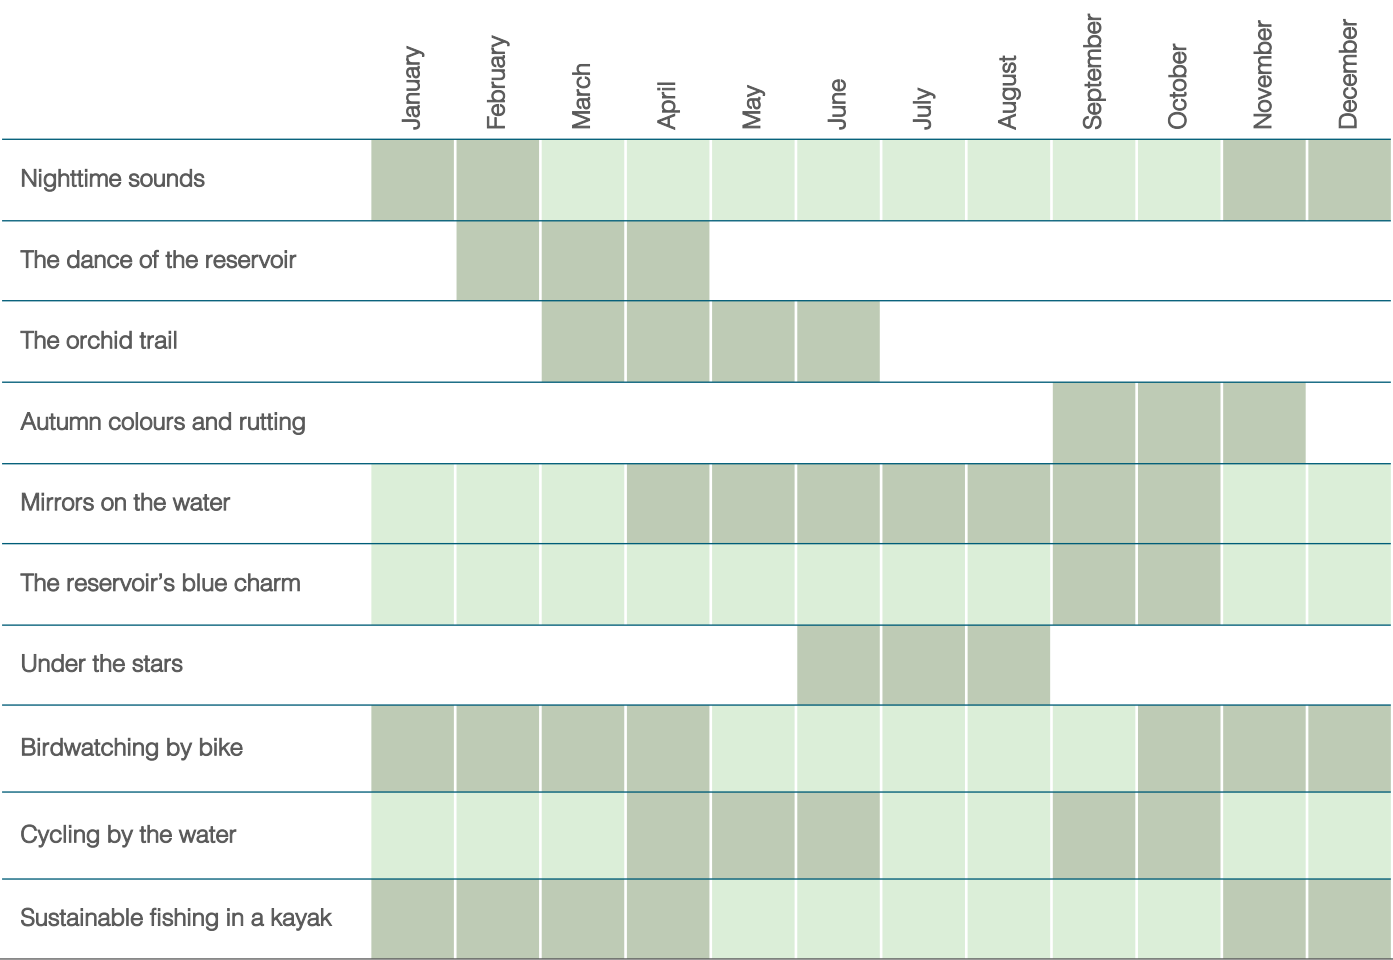

For further information and bookings: See company list on page 56.

SUBMERGED HISTORY

· Tourism experiences ·

Dive into history

Memory of flooded villages

Whispering waters by kayak

Bird's eye view of reservoir memories

The origins of the reservoir

CULTURE, HISTORY AND HERITAGE

Stories below the surface

Below the reservoir's waters lie stories from Álava's recent past. The construction of the reservoir meant the total or partial destruction of Azua, Garaio, Larrintzar, Marieta, Mendixur, Mendizábal, Nanclares de Ganboa, Orenin and Zuazo de Ganboa, whose inhabitants had to abandon their homes and lands to make way for a new landscape. Today, this **past remains alive in memories, family stories and the traces that can still be seen** when water levels subside.

Paths, heritage and landscape

The area still identifies strongly with rural life. Churches, chapels and local heritage items reflect a way of life that is closely linked to the land, while the old paths between villages have become walking routes that reveal **how the landscape has changed over time**.

A land of memory and resilience

The history of the reservoir is also a tale of **adaptation and collective resilience**. The relationship with the reservoir has evolved, giving rise to new ways of using and enjoying the land without forgetting the strong connection to its past. Visiting this space is to learn about a collective memory, a landscape filled with meaning, where culture, nature and human experience come together for a one-of-a-kind experience.

DIVE INTO HISTORY

Discover the past hidden below the reservoir's waters

Explore the **extraordinary heritage that remains hidden underwater**. In this guided dive experience, you will dive down into the depths of the reservoir to discover the **old villages and constructions** that were **submerged** after its creation.

Under the water lies unseen **heritage** that allows you to understand life in the old valley and how the creation of the reservoir **changed the land**.

Before the dive, you will learn about the history of the Gamboa valley and how the dam was built. Underneath the water will be a different sensory experience: **light filtering down, submerged plants** and resounding **silence**, creating a unique atmosphere that merits a leisurely exploration.

 **When:** All year round (better visibility in cold waters).

 **Duration:** 3-4 hours.

 **Where:** Permitted areas of the reservoir selected for safety reasons.

 **Ideal for:** Those interested in exploring, both experienced and novice divers.

 **Difficulty:** Medium. Guided activity led by specialist instructors.

 **Remember:** This activity is dependent on water conditions, visibility and the weather.

 **What to take:** Any necessary equipment will be provided by the technical team.

For further information and bookings: See company list on page 56.

MEMORY OF FLOODED VILLAGES

Journey to the past through its landscapes and stories

Discover the **history of old villages that once formed part of daily life in the valley** in a **guided tour** of vantage points, paths, towns and villages that surround the reservoir. Throughout this trip you will learn **what life was like before the valley was flooded** and how this process transformed the landscape.

Old photographs, stories and references to the land will help you to build up a picture of these villages that **disappeared** and what life was like for the communities who used to live there, making it possible for you to understand the reservoir not only as a space for nature, but also as a **meaningful cultural landscape** that acts as a custodian of the history of those who lived there.

 **When:** All year.

 **Duration:** 3-4 hours.

 **Where:** Municipalities and viewpoints in the area.

 **Ideal for:** Those interested in local history, heritage and landscape.

 **Difficulty:** Easy. Route on easy paths.

 **Remember:** This is an activity that is dependent on the weather.

 **What to take:** Comfortable clothing, footwear suitable for walking, water and sun protection.

For further information and bookings: See company list on page 56.

WHISPERING WATERS BY KAYAK

Discover the reservoir from its own calm waters

Kayak around the reservoir and enjoy a different perspective on the landscape. **Gliding through its calm waters, you will discover its wealth of biodiversity, hidden corners and the history that shapes this environment.**

The activity combines **gentle sport** and **landscape appreciation** in a guided tour which incorporates the **nature** of the reservoir, its **environmental importance** and its **history**.

Kayaking lets you explore the **less-visited parts of the reservoir**, offering a calming, sustainable experience that brings you closer to nature.

-  **When:** Spring, summer and early autumn.
-  **Duration:** 3-4 hours.
-  **Where:** Quiet and safe areas of the reservoir.
-  **Ideal for:** Nature lovers and those who like active tourism.
-  **Difficulty:** Easy. No previous experience necessary.
-  **Remember:** This activity is dependent on the weather.
-  **What to take:** Comfortable clothing, water and sun protection.

For further information and bookings: See company list on page 56.

BIRD'S EYE VIEW OF RESERVOIR MEMORIES

Discover the landscape through its history and its birds

Explore the reservoir from a perspective that brings together **nature**, **history** and **birdwatching**. This experience is a guided walk along paths and past viewpoints where you can discover **what the old valley of Gamboa was like, how its people lived and how the landscape changed** to become what it is today.

At the same time, you will get the chance to **observe** and **identify** some of the wetland's most common **birds** from strategic sites and unobtrusive birdwatching huts. A comprehensive way of understanding the reservoir by looking at how it used to be and what it is today.

 **When:** All year round (especially in spring and autumn during migrations).

 **Duration:** 3-4 hours.

 **Where:** Paths, viewpoints and birdwatching huts around the reservoir.

 **Ideal for:** Nature-lovers, birdwatchers and history buffs.

 **Difficulty:** Easy. Signposted routes without any difficulties.

 **Remember:** This activity is dependent on the weather and bird behaviour.

 **What to take:** Comfortable clothes and footwear for walking in. Binoculars are recommended.

For further information and bookings: See company list on page 56.

THE ORIGINS OF THE RESERVOIR

Discover how the current landscape came to be

Learn **how the reservoir was created** on a **guided visit to the dam** and discover how the former farming valley became the landscape you see today.

During the visit you will discover why this **impressive feat of engineering** was built, the technical challenges faced at the time and how it **changed the lives of the communities** living in the valley.

This is an opportunity to understand the reservoir not only as a space for nature, but also as a **symbol of the landscape's transformation** and a key part of the region's water infrastructure.

 **When:** All year round.

 **Duration:** 1,5-2 hours.

 **Where:** Reservoir dam.

 **Ideal for:** The general public.

 **Difficulty:** Easy. Short and simple route.

 **Remember:** This activity is subject to access and safety conditions.

 **What to take:** Comfortable, weather-appropriate clothing.

For further information and bookings: See company list on page 56.
